

SUSTAINABLE CONSTRUCTION

A Life Cycle Approach in Engineering

Luís Bragança
Heli Koukkari
Milan Veljkovic
Ruben Paul Borg

University of Malta

International Symposium
Malta 2010

Contents

Sustainability of Constructions: Integrated Approach to Life-time Structural Engineering <i>Bragança L., Koukkari H., Blok R., Gervásio H., Veljkovic M., Plewako Z., Landolfo R., Ungureanu V.</i>	1
Chapter 1 Sustainable Construction	15
The Role of Environmental Assessment of Buildings <i>Haapio A.</i>	17
Building Sustainability Assessment: System SBToolPT <i>Mateus R., Bragança L.</i>	25
Green Building Design Guideline <i>Kahraman İ.</i>	33
Chapter 2 Eco-efficiency	41
Structural, economic and environmental performance of fibre reinforced wood profiles vs. Solutions made of steel and concrete <i>Manthey C. & Guenther E., Heiduschke A. & Haller P., Heistermann T. & Veljkovic M., Hájek P.</i>	43
Comparative Life-Cycle Impact Assessment of Short RC Columns and Composite Columns <i>Lukic I.</i>	59
Life Cycle Inventory of Stainless Steel: A Review of Challenges, Methods and Applications <i>Rossi B.</i>	67
The potential use of Waste Tyre Fibres in Concrete. <i>Borg R.P., Farrugia C.</i>	77
Sustainable Planning of Renewal of Buildings in Public Ownership <i>Kusar M., Selih J.</i>	91
Perceptions of Sustainable Housing Design: Current Strategies for Zero Carbon <i>McCullough J.E.</i>	97
Sustainable design in the neighbourhood scale: Analysis of planning issues and case studies. <i>Tsirigoti D.</i>	105
