

Infrastructure

RESEARCH OUTPUT FROM REPOSITORY NETWORK. INTEGRATED EUROPEAN RESEARCH INFORMATION WITH LINKS FROM PUBLICATIONS TO RESEARCH DATA AND FUNDING.

Services

ACCESS, SHARE, REUSE, ENHANCE AND MONITOR RESEARCH OUTPUT. DISSEMINATE AND INTEGRATE RESEARCH RESULTS.

OpenAIRE

Guidelines for

Data Archive, Literature Repository & CRIS managers

What is OpenAIRE?

- A Participatory European Open Access infrastructure to manage scientific publications and associated scientific material via repository networks.
- Supports discovery, sharing and re-use of Open Access publications and EC funded research results.
- Enhances publications by interconnecting them with data sets, funding information, related publications, institutional affiliation, metrics.
- OpenAIRE is an FP7 funded project, now in its 2nd phase until May 2014, with 41 partners involved: Univ. of Athens, Goettingen State Library, CNR-ISTI, Univ. of Warsaw, Bielefeld Univ. Library, CERN, Gent Library, eIFL, DTU, Univ. of Minho, SURF, + 32 national Open Access desks reaching out to all EU member states (and beyond). 3 scientific communities involved in linking publication to research data: EBI, DANS, BADC. Collaboration with EuroCRIS, EUDAT, DataCite, ORCID, COAR, LIBER, SPARC Europe.

What are the OpenAIRE Guidelines?

- OpenAIRE has collaborated with key stakeholders and has produced three sets of guidelines for its data providers, all based on existing well-established standards.
 1. Guidelines for Literature Repositories: based on Dublin Core (DRIVER)
 2. Guidelines for Data Repositories: based on DataCite
 3. Guidelines for CRIS Managers: based on CERIF-XML
- Provide additional support for OAI Aggregators and Open Access Journals to maintain provenance on the record or at journal level
- Best practices for the use of transfer protocol (OAI-PMH), metadata formats, controlled vocabularies.
- Guidelines make it easy to participate in the OpenAIRE network providing to repository managers the tools to support researchers in the EC's Open Access policy compliance.

How do they work?

- Assist heterogeneous e-infrastructures like repositories, data archives and CRIS to interoperate in one common information space.
- Validation / Registration of OpenAIRE compatible data sources.
- Metadata is aggregated through simple OAI-sets: 'openaire' for thematic and institutional repositories and 'openaire_data' for data repositories.
- Identification of Open Access and funded research results by OAI-Sets: 'openaire' / 'openaire_data'.
- Regular harvesting from the data sources.
- Latest schema guarantees backwards-compatibility with previous versions.
- Enhancing research results by metadata enrichment in OpenAIRE.

How to get involved?

- Find and discuss the guidelines at: guidelines.openaire.eu
- Test your repository for 'compliance' and register the OpenAIRE validator at: validator.openaire.eu
- Find help & support and more information: www.openaire.eu
