SUSTAINABLE BUILDINGS CONSTRUCTION PRODUCTS & TECHNOLOGIES FULL PAPERS

**25 – 28 SEPTEMBER 2013
GRAZ UNIVERSITY OF TECHNOLOGY,
AUSTRIA**

IN CO-OPERATION WITH:

Proceedings of the

SUSTAINABLE BUILDINGS – CONSTRUCTION PRODUCTS & TECHNOLOGIES

Collection of Full Papers

Edited by

Karl Höfler

AEE – Institute for Sustainable Technologies, Austria

Peter Maydl

Graz University of Technology, Austria

Alexander Passer

Graz University of Technology, Austria

Table of Contents

Forewords

Forewords	1
------------------	---

A1 - Legal and economic frame conditions for ecological high quality refurbishment

TOPIC A1	14
-----------------	----

Comparison between energy usage and thermal comfort of typical masonry houses in Ireland before and after receiving retrofit	15
---	----

Jamie Goggins

Collaboration Models for Industrialised Renovation Methods and Prefabrication - Experience and Outlook on Organizational and Legal Frame Conditions	27
--	----

Sonja Geier

Cost optimal building standards - evidence based! The case of Austria	39
--	----

Walter Huettler, Johannes Rammerstorfer

Comprehensive Assessment for the Refurbishment of Chinese Existing Building	50
--	----

Lei Fan, Yuanfeng Wang

A2 - Life cycle perspectives in a high refurbishment - Part 1

TOPIC A2	59
-----------------	----

Critical Issues in Application of New European Standard EN15978 in building refurbishments	60
---	----

Stepan Mancik, Julie Hodkova, Antonin Lupisek

Environmental and economical assessment of refurbishment concepts	69
--	----

Tarja Häkkinen

LCA and LCC based Energy Optimization of Building Renovation Strategies	77
--	----

Francesco Pittau, Enrico De Angelis, Giorgio Pansa, Nadia Villa, Antonio La Torre, Caterina Porcino

NZE-renovation of houses: Life cycle costs & environmental impact	87
--	----

Jeroen Vrijders, Lisa Wastiels

Retrofitting solid wall buildings: carbon costs and savings	95
--	----

Alice Moncaster

A3 - Life cycle perspectives in a high quality refurbishment - Part 2

TOPIC A3	102
-----------------	-----

Life Cycle in Timber Façade Systems - Robust Design Patterns	103
---	-----

Stephan Ott, Stefan Winter

Naturwall: active timber wall for renovation of existent buildings	114
---	-----

Antonio Spinelli, Guido Callegari, Chiara Rizzi

Finding the Balance between Measures Reducing Energy Demand and Measures Based on Renewable Energy Sources in Building Renovation	122
--	-----

Walter Ott

Management and financial tools for housing regeneration	131
--	-----

Paola Piermattei

Catalogue of passive house details for refurbishments	139
--	-----

Thomas Zelger

A4 - Technologies and aspects of high quality refurbishment in nonresidential constructions

TOPIC A4	151
-----------------	-----

Requirements and solutions for high performance school renovations	152
---	-----

Armin Knotzer

Indoor Environment Quality in Riga City Kindergarten Buildings: Actual Data, Problems and Solutions	159
--	-----

Eriks Kruminis

Re-Commissioning Services: Immediate Savings and Triggering Building Refurbishment Measures in Non-Residential Buildings	166
---	-----

Reinhard Ungerböck

Risk Assessment for Energy Efficient Refurbishment of 19th Century Townhouses Using Interior Insulation	173
--	-----

Paul Wegerer

Analysis of the thermal behaviour of historical box type windows for renovation concepts with CFD	181
--	-----

Daniel Brandl

A5 - Opportunities and potentials for an energy efficient modernisation of syndicates of municipalities

TOPIC A5	195
Selection of refurbishment construction solutions to improve the IEQ and Sustainability of a building	196
Sandra Monteiro da Silva, Manuela Almeida	
The uncertainty of the energy demand in existing Mediterranean urban blocks	204
Joana Ortiz	
PV integration in the open urban space redevelopment of historical villages in Italy	213
Pierluigi Bonomo	
Energy efficient roofs retrofit for communist prefab concrete blocks	223
Catalina Bocan	
Methodology for improving and testing the quality of renovation actions: a case study application(modified according to reviewer's suggestion)	232
Jacopo Gaspari, Andrea Boeri, Danila Longo	

A6 - Demonstration projects considering new technologies and innovative concepts in rehabilitaion of large-volume buildings

TOPIC A6	240
Comparative analysis for the refurbishment of the high-rise concrete building stock based on life cycle assessment scenarios	241
Sára Hrabovszky-Horváth, Zsuzsa Szalay, Tamás Csoknyai	
"Johann Böhmstrasse": Renovation concept towards energy plus standard with prefabricated active roof and facade elements, integrated home automation and grid interaction	251
Tobias Weiss	
Block of Flats from 1958, Rejuvenated with Wood	256
Florian Lichtblau	
Renovation to plus- energy- standard schools - Rainbach im Mühlkreis/Austria	261
Ingrid Domenig-Meisinger, Albert Böhm	
E-Office: a prime example for energy efficiency	269
Urs Harnik-Lauris	

B1 - Best Practice in Sustainable Buildings

TOPIC B1 277

Best case plus-energy renovation of a residential building in Kapfenberg assessed with the ÖGNB Austrian Building Certification Scheme and klima:aktiv building standard 278

Alexander Passer, Susanne Geissler

Certification System for Research and Laboratory Buildings - The Case Study MED CAMPUS Graz 293

Helmuth Kreiner

B2 - Evaluation of Embodied Energy and Carbon Dioxide Emissions for Building Construction (Annex 57)

TOPIC B2 294

EVALUATION OF EMBODIED ENERGY AND CARBON DIOXIDE EMISSIONS FOR BUILDING CONSTRUCTION 295

Tatsuo Oka

Key contributors to embodied carbon and energy of four Brazilian case studies 303

Maristela Silva, Vanessa Gomes, Marcella Saade

Embodied energy and CO₂ emission associated with building construction by using I/O based database and process based database in Japan 311

Noriyoshi Yokoo, Toru Terashima, Tatsuo Oka

Review of LCA for concrete and its applicability to Austria 317

Alexander Passer, Gerfried Klammer, Gernot Fischer, Joachim Juhart

B3 - Facade

TOPIC B3 323

Leichtbau 3.0: Material, Structure, Energy 324

Oliver Enghardt

Energy performance of windows in various building types 326

Adrian Trzaski

The pitfalls of building integrated photovoltaic. 334

Dieter Moor

Novel type of façade-window solar thermal collector 340

Ilija Nasov, Anka Trajkovska Petkoska

Development of innovative building skins in the context sustainability assessment	348
--	-----

Gernot Fischer, Alexander Passer, Thomas Mach, Helmuth Kreiner

B4 - Best Practice

TOPIC B4	350
-----------------	-----

Environmental performance of energy efficient residential building - a case study of Lithuania	351
---	-----

Violeta Motuziene, Tatjana Vilutiene, Artur Rogoza

Reality check of a brick made plus energy dwelling	359
---	-----

Tim Selke

LCA of a Net Zero Energy Office Building - The New Technology Park of Bolzano	367
--	-----

Marina Fusco, Ulrich Filippi Oberegger, Roberto Lollini, Giulia Paoletti

Integration of sustainability targets in the planning process and their consequences project results - case study of the MED CAMPUS Graz	375
---	-----

Heinrich Schober, Alexander Passer

Plus Energy Building in Estonia	394
--	-----

Georg W. Reinberg

B5 - Database & Tools

TOPIC B5	405
-----------------	-----

Towards a new generation of building LCA tools adapted to the building design process and to the user needs	406
--	-----

Sebastien Lasvaux

The use of Generic LCIA Databases in the Process of Building Sustainability Assessment - the case of SBToolPT®	418
---	-----

Ricardo Mateus, Luís Bragança

Adapting existing life cycle inventory of building products for the brazilian context	426
--	-----

Luciana Oliveira, Sébastien LASVAUX, Endrit HOXHA, Julien Hans

LCC and LCA of dynamic building elements in the context of social housing	437
--	-----

Damien Trigaux, Frank De Troyer, Karen Allacker, Anne Paduart, Wim Debacker, Niels De Temmerman

B6 - Certification sheems

TOPIC B6	448
Guidelines and Indicators for Sustainable Mega-Event-Buildings	449
Natalie Essig	
A free building assessment tool facilitates change in the construction sector towards environmental, economic and social sustainability	456
Susanne Geissler	
Schools go green - extension of the BNB-Certification methodology for educational buildings	460
Carl-Alexander Graubner, Carmen Schneider	
Challenges of LCA in a European context - Findings from the research projects OPEN HOUSE and EeBGuide	466
Johannes Gantner, Sebastien Lasvaux, Katrin Lenz, Julia Böttge, Sarah Schneider, Sarah Homolka	
Practical Aids, Instruments and Tools of the Assessment System for Sustainable Building (BNB)	476
Andreas Rietz, Hedemarie Scütz	

C1 - Building Information Modelling

TOPIC C1	480
An Integrated BIM LCA framework for the assessment of Chinese urban residential buildings	481
Wei Yang, Shanshan Wang	
Life Cycle Sustainable Assessment and BIM	489
Bruno Fiès, Thomas Lützkendorf, Maria Balouktsi	
The sustainability effects of Product/Service-System design validated through Life Cycle Assessment	500
Leise Dreijer, Morten Birkved, Thomas Howard, Niki Bey	
An LCA Study on a Concrete Structure by Variations of Compressive Strength of Concrete to define the characteristics of GHGs emission	512
Chae Chang-U, Suhyun Cho, Sunghee Kim, Jiyeon Park	

C2 - Smart Cities - Part 1

TOPIC C2	520
Environmental sustainability assessment of urban systems applying coupled urban metabolism and life cycle assessment	521
Morten Birkved, Benjamin Goldstein	
Modelling the transformation of the residential building stock - a case study for the city of St. Gall	533
Susanne Kytzia	
Norwegian Smart Cities - Towards cross-scale indicators	546
Rolf Andrè Bohne	
Efficiency Optimization of a real Settlement	556
Azra Korjenic	
SMART ENERGY DEMONstration: First research results of an Austrian SMART CITY	562
Alois Kraussler	

C3 - Smart Cities - Part 2

TOPIC C3	570
KomMod as a tool to support municipalities on their way to becoming Smart Energy Cities	571
Jan-Bleicke Eggers, Gerhard Stryi-Hipp	
Project -“Morgenstadt: City Insights” - Analysis of Interactions Between Key Factors	583
Elvira Ockel	
Towards Sustainable Knowledge Ecosystem with Open Data, Co-creation and User Empowerment	592
Robert Eriksson, Suvi Nenonen	
Intensity and Spatial Influence of Urban Parks: A case study in Sao Paulo, Brazil	600
Paula Shinzato	
Leadproject ECR Energy City Graz-Reininghaus □ □ Framework Plan Energy Graz-Reininghaus	608
Ernst Rainer, Kersten Hofbauer, Hans Schnitzer, Thomas Mach, Alexander Passer, Peter Maydl, Lothar Fickert, Helmuth Kreiner	

C4 - Green Products - Part 1

TOPIC C4	620
Using life cycle based environmental assessment in developing innovative multi-functional glass-polymer windows	621
Karen Allacker, Maria Calero, Fabrice Mathieux, Catia Baldassarri, Ya Roderick	
Carbon footprint of green roofs in Singapore	629
Nalanie Mithraratne	
Life-Cycle Energy Performance of Semi-Transparent Building-Integrated Photovoltaic (BIPV) Windows in Tropical Singapore	638
Poh Khai Ng, Nalanie Mithraratne	
Medium-rise structural timber apartments; Luxury or long-term carbon storage solution?	647
Douglas Thomas, Grace Ding, Keith Crews	
Optimization of wood based structural elements concepts for increased resource efficiency	655
Alireza Fadai, Wolfgang Winter	

C5 - Green Products - Part 2

TOPIC C5	663
Environmental improvement of building insulating cladding system	664
Paola Garbagnoli, Marta Musitelli, Maria Vittoria Diamanti, Barbara Del Curto, MariaPia Pedeferra	
The environmental footprint of plastic pipe systems within the built environment	672
Sandor Aranyi, Carolin Spirinckx, Zoran Davidovski, Karolien Peeters	
Symbio2 - An Integrated system for the production of microalgae in the urban environment in symbiosis with building systems and their envelope.	681
Alistar Law	
A proposal for the information needed with respect to BRCW7: Sustainable use of natural resources	690
Tom Harrison	

C6 - Green Products - Part 3

TOPIC C6	700
A Comparative Analysis of Life Cycle Impact Assessment Methods for Building Materials	701
saniye karaman oztas, C.Zeynep Oguz, Leyla Tanacan	
Product Design Aspects of Agro-fibres Biocomposites for Architectural Applications	709
Hanaa Dahy	
Challenging ETICS	720
Wolfgang Winter, Ingo Curt Riemenschneider, Markus Mosing, Heinz Ferik	
Measuring the Ug-value of window glazing	732
Helmut Weinsläder, Sven Hippeli	
Identification of building materials influence on robustness and uncertainty of single houses LCA	739
Endrit Hoxha	

D1 - Energy

TOPIC D1	750
Assessment of the relevance of “embodied energy” in the building stock of the city of Zurich	751
Holger Wallbaum, Martin Jakob, Gregor Martius, York Ostermeyer	
The Energy Sufficiency Path: Basics for Residential Buildings	760
Annette Aumann, Katrin Pfäffli, Heinrich Gugerli	
Residential High-Rises without the usage of Air-Conditioning in Tropical and Subtropical Regions	768
Ferdinand Oswald	
Criteria for low energy buildings	779
Jerzy Kwiatkowski, Aleksander Panek	

D2 - Renewables

TOPIC D2	787
Zero Carbon Village Energy self-sufficiency, Modular Prefabrication and Sustainable Building Materials	788
Robert Wimmer, Sören Eikemeier	

Wood in Carbon Efficient Constructions	795
Franz Dolezal, Hildegund Mötzl, Oskar Mair am Tinkhof, Christina Spitzbart	
Greenhouse gas emission from construction process of multi-story wooden buildings	806
Atsushi Takano, Francesco Pittau, Annette Hafner, Stephan Ott	
Recycling and End-of-Life scenarios for timber structures	814
Annette Hafner, Stephan Ott, Stefan Winter	
Regulation of displacement ventilation systems combined with surface heating/cooling in passive house office model rooms	825
Tobias Waltjen, Bernhard Lipp, Thomas Zelger, Markus Rösler, Ralf Gritzki	
D3 - Integrated Design Process	
TOPIC D3	835
Sustainability in Competitions: New German Federal System to verify the Qualities of Sustainability in Planning Competitions (SNAP)	836
Merten Welsch	
Debating economic performance aspects of buildings in the context of sustainability assessments	843
Thomas Lützkendorf, David Lorenz, Peter Michl	
Interaction between sustainability and quality in buildings - Systemic approach for sustainability issues	856
Annette Hafner	
The impact of sustainability issues on real estate project development processes	868
Wilhelm Brugger, Werner Gächter, Arnold Tautschnig	
Nearly zero energy target integration in public design tenders	877
Giulia Paoletti, Annamaria Belleri, Roberto Lollini, Hannes Mahlknecht	
D4 - Sustainable Assessment	
TOPIC D4	885
Realising Blue Buildings? - Life Cycle Management as an integrated management philosophy for blue building projects	886
Rainer Stempkowski	
Benchmarking of DGNB-Certified Buildings in Austria	896
Alexander Passer, Roman Smutny	

SB13 Graz - Extended Abstract Achieve Sustainability in Laboratory Buildings on different Ways - Building, Equipment and User Behavior 906

Egbert Dittrich

Time Valued Life Cycle Greenhouse Gas Emissions from Buildings 918

Howard Darby, Abbas Elmualim, Fergal Kelly

The influence of structural design on the sustainability assessment of building constructions 930

Julia Maydl

D5 - Blue Buildings

TOPIC D5 939

Development of LCA Tool for Use in Initial Stage of Housing Design Based on Endpoint Modeling of Residents Part. 1 Examination of Assessment Framework 940

Azusa Takayama, Koichi ASANO, Ken-ichi HASEGAWA, Hideto KANNO, Ryo MURATA, Yuki TENMA, Naoshi KANEKO

Contribution of plastics to the sustainability of buildings 948

Arjen Sevenster

Relevance of the recycling potential (module D) in building LCA: A case study on the retrofitting of a house in Seraing 955

Lisa Wastiels, Laetitia Delem, Johan Van Dessel

Decision making processes in sustainable refurbishment projects for public administration 965

Linus Waltenberger, Bernhard Herzog, Florian Danner

D6 - Life Cycle Assessment

TOPIC D6 972

The need for a comprehensive and consistent approach in life cycle sustainability assessment of buildings 973

Karen Allacker, Rana Pant, Erwin M. Schau

A modular LCA database adapted to different user needs during the building design process 982

Galdric Sibiude, Sébastien Lasvaux, Manuel Bazzana, Alexandra Lebert, Pierre Ravel, Laëtitia Arantes, Thibault Hallouin, Romain Bonnet

System and scenario choices in the life cycle assessment of a building - changing impacts of the environmental profile 994

Freja Nygaard Rasmussen, Harpa Birgisdottir, Morten Birkved

Trends in Building & Construction Life Cycle Assessment 1004
Bastian Wittstock, Matthias Fischer, Julia Böttge, Johannes Gantner,
Elvira Ockel, Anna Braune

Life Cycle Assessments and the Austrian Construction Sector 1012
Florian Gschösser, Alexander Passer, Stefan Marchtrenker

Posters

POSTERS 1024

Renovation strategies for ageing society 1025
Markus Summer, Iva Kovacic, Christoph Achammer

Gender Perspectives on the Design and Optimisation of Highly Energy Efficient Buildings 1037
Siegrun Klug, Susanne Geissler, Edeltraud Haselsteiner,
Gabriele Bargehr, Sabine Steinbacher

Cost optimal levels for envelope components in residential building renovation-Rainha Dona Leonor neighborhood case study 1045
Ana Rodrigues, Manuela Almeida, Marco Ferreira, Pedro Silva

Building Envelope Retrofits for Improved Energy Performance and Thermal Comfort in Detached Houses in Serbia 1053
Vladimir Jovanovic

Life cycle assessment of wooden building systems for façade retrofitting 1063
CECILE HUREL

Co-Benefits in Building Retrofit - Methodology proposal, tool development and a case-study demonstration 1071
Marco Ferreira, Manuela Almeida, Dias Nelson, Ana Rodrigues

BIPV-Standard Module for Large-Scale Halls 1079
Claudio Ferrara, Carmen Vicente Iñigo

Prefabricated Retrofit Façade System - a Systemized Building Construction Detailing 1087
Stephan Ott, Stefan Loebus, Stefan Winter

Assessment of Double Skin Façade Technologies for Office Refurbishments in the United Kingdom 1098
Francesco Pomponi, Kenneth Ip, Poorang Piroozfar

Characterization and Classification of the Energy Performance of Facades According to Climate and Location 1110
Marlix Perez Gonzalez, Elena Cuerda, Javier Neila

Characterization and Classification of the Energy Performance of Facades According to Climate and Location 1117
Marlix Perez Gonzalez, Elena Cuerda, Javier Neila

Evaluating the energy savings potential of window refurbishment	1124
Helmut Weinsläder, Cornelia Stark, Erik Fischer	
Monitoring results of PCM systems for room cooling	1130
Helmut Weinsläder, Werner Körner	
Cost-effective and high performance renovation of existing residential multi-family buildings in three European countries	1139
Holger Wallbaum, York Ostermeyer, Andrea Chegut, Rolf Bastiaanssen	
Innovative modernization of historic buildings - pilot projects in Vienna	1141
Walter Huettler, Johannes Rammerstorfer	
Energy Demand Calculations - View from above	1150
Jan Tywoniak, Jan Antonin, Pavel Kopecky	
CESBA - a collective initiative for the new building culture in Europe	1154
Markus Berchtold, Andrea Moro	
Human Scientific Contributions to Life Cycle Sustainability	1159
Harald Deinsberger-Deinsweger	
OPEN HOUSE: Common European methodology for assessing building sustainability	1171
Daniel Hiniesto, Vincent Peyramale, Rocio Barros, Edith Guedella, Natalie Essig	
Development of a Performance Based Evaluation Method for Carbon Management of Existing Buildings in Egypt	1179
Khaled Tarabieh, Mirette Khorshed	
Better understanding and modelling of user behavior in (nearly) zero energy buildings	1189
Wibke Tritthart, Jürgen Suschek-Berger, Anita Thaler, Magdalena Wicher	
Timber in the City	1191
Milena Stavric, Stefan Zedlacher	
Criteria of Mobility for Sustainable Buildings	1198
Herbert C. Leindecker, Isabella Dornigg	
High Performance Buildings Quality Assessment	1208
Herbert C. Leindecker, Susanne Luger	
Assessment of an Office Building in Serbia by New Proposed Methodology - „OPEN HOUSE“	1216
Djordje Djordjevic, Biljana Avramovic	
Case study: Green family house in Slovenia, from planning until certification	1223
Matjaž Nekrep Perc, Benedikt Boršič	

Improving comfort condition in the building	1234
Abdolsalam Ebrahimpour, Yousef Karimi Vahed	
Integration of Zero Energy Standards into Student Accommodation: Demonstrated through a Case Study of Lancaster University Residences in the UK	1242
Hasim Altan	
A Study on Assessment Methodology to Measure Carbon Reduction Potentials of Recycling Building Materials considering Avoided Impacts	1252
Sunghee Kim	
Using MFA for the performance economy : a case study of industrial storage	1260
Thomas PEVERELLI, Célian Colon, Thomas Peverelli, Samuel Causse	
Identification of climate neutral buildings using LCA - Case studies from the project ÖKOPLUS-KOMPLEX	1269
Johann Pucker, Gerfried Jungmeier, Stefan Gunczy, Karl-Peter Felberbauer, Rudolf Stiglbrunner, David Tudiwer, Reinhard Padinger	
Sustainability issues in the valuation process of project developements	1273
Georg Fröch, Arnold Tautschnig, Christoph Achammer	
Non-state market driven governance in the Green Building sector	1284
Sabine Sedlacek, Hannes Hippacher	
Proposition of socioeconomic logical attributes to aid decision making processes in Brazilian construction sector: complementing LCA results	1290
Marcella Saade, Maristela Silva, Vanessa Gomes	
Indicators to Support Sustainability and Performance-Based Selection of Structural Frame Alternatives in Concrete: Validation at Typical Floor and Superstructure Levels	1298
flavia oliveira, Maristela Silva, Vanessa Gomes	
Performance of Domed Roofs using a New Computer Model	1306
Giamal Mashina	
Embodied energy and CO2 emission associated with building construction by using I/O based database and process based database in Japan	1313
Noriyoshi Yokoo, Toru Terashima, Tatsuo Oka	
Combining Concepts of Energetic, Environmental and Economic Life Cycle Balance towards an Integrated Life Cycle Approach	1319
Susanne Geissler, Christina Ipser, Ulrike Radosch, Helmut Floegl, Hildegund Mötzl	

Can form follow energy? - Critical factors in modelling for computational design optimization	1326
Sven Schneider	
The Energy Performance of Commercial Building Facades in Saudi Arabia	1334
Mohammed Essam Shaawat, Salah Alghamdi, Noman Ashraf	
Assessing the severity of workmanship defects using thermography and 2-D and 3-D heat transfer models	1342
Tim Taylor, John Counsell, Steve Gill, Gerraint Oakley	
Water and Energy Recycling in a Residential Passive House	1353
Erwin Nolde	
ELIH-MED - Energy Efficiency in Low Income Housing in the Mediterranean area	1361
Anna Moreno	
Life Cycle Assessment for sustainable buildings during the planning phase	1369
Anton Zuser, Barbara Jörg, Maria Popp, Bernhard Herzog, Thomas Belazzi	
In situ U-value measurements for today's Cypriot Houses	1376
Flouris Xeni	
Life Cycle Costing of innovative energy storage systems in buildings	1387
Julia Böttge, Sarah Homolka	
Real-time Energy Simulation for Advanced Building Control	1395
Karsten Menzel	
Energy Efficiency Using Integrated ICT Systems: Business Challenges and Opportunities	1404
Gaby Abdalla	
Comparison of sustainable office facade renovations in the Netherlands	1406
Michiel Ritzen, Roland Rovers	
The CO₂ footprint of plastic pipe systems	1421
Carolin Spirinkx	
Cooling concept of the new R&D building of the ZAE Bayern using several thermal energy storage technologies	1430
Felix Klinker, Christina Konstantinidou, Helmut Weinläder, Harald Mehling, Dietrich Büttner, Stephan Weismann, Hans-Peter Ebert, Eberhard Lävemann, Werner Jensch, Thilo Ebert	
Refurbishment of a Viennese residential estate to future building standards with integrated PV	1439
Christoph Neururer	

LifeCycle Tower - The Natural Change in Urban Architecture	1447
Michael Zangerl, Jakob Bonomo	
Concrete Repair Mortar Made of a Waste from Oil Refining Industry	1455
Carla COSTA, Maria Sofia RIBEIRO, Nuno BRITO	
Biobased Sandwich System for Applications in Architecture	1463
Andreas Krombholz	
Identification of non-linear thermal dynamics of buildings from simulation and real measurement data	1471
Martin Pichler, Iakovos Michailidis	
STOREPET - EUROPEAN PROJECT OF CONSTRUCTION CLUSTER „DUNDJER“	1479
Djordje Djordjevic, Biljana Avramovic	
Implementing dynamic load-bearing structures on a generic case study	1487
Mieke Vandenbroucke, Wim Debacker, Niels De Temmerman	
Improving thermal performance of rammed earth walls using expanded clay aggregate	1499
José Correia-da-Silva	
Future Building Performance Factors towards Energy Efficient Travel Plan in Regional Development	1506
Ali Keyvanfar, Arezou Shafaghat	
Climate:active renewable raw materials (k:a NAWARO)	1515
Maria Amtmann, Andrea Bruckner	
Hometainer	1520
Georg Stubitsch	
Assessing the energy aspects of settlements	1528
Gernot Stöglehner, Karl-Heinz Kettl, Michael Narodoslowsky	
GUGLE - A smart urban quarter model for the building stock in Vienna	1536
Martin Treberspurg	
Holistic Evaluation of Sustainable Urban Districts	1548
Stephan Anders	
Monitoring of Land Use Development and Building Stock in Germany - Methodology and Results	1558
Gotthard Meinel, Robert Hecht, Hendrik Herold, Martin Behnisch	
Orona IDeO - innovation city	1569
Xabier Barrutieta	

Austrian State Prize Architecture and Sustainability	1576
Helmut Krapmeier	
building bridges@research - gender and diversity perspectives in electric mobility	1582
Tobias Berg, Carmen Leicht-Scholten
