Foreword

Luís Bragança, Manuel Pinheiro, Ricardo Mateus

Chapter 1: Nearly Zero Energy Buildings

- Cost optimal building renovation with a net zero energy target for the Portuguese single-family building stock built before 1960 3
Manuela Almeida, Marco Ferreira, Micael Pereira
- Zero-Energy-Buildings and their arrangement in Zero-Energy-Urban-Quarters in different climates: Derivation of design strategies based on climatic parameters, examples for building and urban quarter typologies and comparison with the existing ones 11
Udo Dietrich, Franz Kiehl, Liana Stoica
- The first phase of a zero emission concept for an office building in Norway 19
Torhildur Kristjansdottir, Sofie Mellegård, Tor Helge Dokka, Berit Time, Matthias Haase, Jens Tønnesen
- Assessing design practices towards nearly zero energy buildings 27
Patrícia Morais, Ana Tomé
- Cost optimality and nZEB target in the renovation of Portuguese building stock. Rainha Dona Leonor neighborhood case study 35
Manuela Almeida, Ana Rodrigues, Marco Ferreira
- Energy Performance of a Galician Hostel 43
Ruth Dominguez Sanchez, César Bedoya Frutos
- Monitoring of Indoor Climate of a Net Zero Energy Office in Flanders 51
Griet Verbeeck, Elke Meex
- The qualifications and professional competencies of architects on the energy efficiency of buildings. Are they prepared to embrace the 2020 targets? 59
Sílvia Fernandes, Rui Oliveira, Maria Isabel Abreu

Chapter 2: Policies for Sustainable Construction

- Including sustainability into portfolio decisions: The example of the University of Vienna 69
Sigrid Niemeier, Harald Peterka

Inspection and Diagnosis: A contribution to modern buildings sustainability <i>Sara Amaral, Dulce Franco Henriques</i>	75
Climate change effect on freeze-thaw cycles in Nordic climate <i>Toni Pakkala, Jukka Lahdensivu, Arto Köliö</i>	83
Energy rating of windows for the cooling season: a proposal for Europe <i>Dimitrios Bikas, Katerina Tsikaloudaki, Konstantinos Laskos</i>	91
A Qualitative Assessment of the UK Green Deal: Enabling Energy Efficiency of Buildings by 2050 <i>David Oloke</i>	99
Dividing indoor comfort limits by climate zones and describing it as a curve for the benefit of passive and low tech architecture design. <i>Gustavo Linhares de Siqueira, Udo Dietrich</i>	107
The Primary Energy Factors Play a Central Role in European 2020 Targets Achievement <i>Lorenzo Leoncini</i>	113
Sustainability in construction, between politics and economics. A comparison of the U.S. market and the Italian one. <i>Maria Antonia Barucco</i>	121
Changing Mindsets; Identifying the Need for a Paradigm Shift in Construction Education <i>Conor McManus, Garrett Keenaghan, Maurice Murphy</i>	129
Tomorrow's sustainability: Devising a Framework for Sustainability Education of Future Engineers and Architects <i>Maria Olga Bernaldo, Gonzalo Fernandez-Sanchez, Ana Castillejo, M^a José Rodríguez-Largacha, Ana María Manzanero, Daniel Estévez, Maria Del Mar Cenalmor, Jesús Esteban</i>	137
 Chapter 3: High Performance Sustainable Building Solutions	
Cost vs Benefits analysis in the implementation of sustainable construction principles in a residential building <i>Sérgio Martinho, Constança Rigueiro, Ricardo Mateus</i>	145
Water reuse for domestic consumption - A key element for environmental and economic sustainability <i>José Coimbra, Manuela Almeida</i>	153
Energy consumption and thermal comfort of a passive house built in Romania <i>Cristina Tanasa, Cristian Sabou, Daniel Dan, Valeriu Stoian</i>	161
Post Occupancy Evaluation of University Eco Residences: A Case Study of Student Accommodation at Lancaster, UK <i>Hasim Altan, Mohamed Refaee, Jitka Mohelnikova</i>	167

Computational modelling of the thermal behaviour of an ETFE cushion using IES <i>Eleni Dimitriadou, Andy Shea</i>	175
Natural fibre reinforced earth and lime based mortars <i>César Cardoso, Rute Eires, Aires Camões</i>	183
Rainwater Harvesting Systems in Buildings: Rapid Changes with Substantive Improvements <i>Armando Silva Afonso, Carla Pimentel Rodrigues</i>	191
The energy of water: An evaluation of direct electricity savings due to strategies of water preservation in a social housing compound <i>Antonio Girardi</i>	199
Comparison of costs of brick construction and concrete structure based on functional units <i>Soheyl Sazedj, António J. Morais, Said Jalali</i>	207
Sustainable Daylighting Design in Southern European Regions <i>António J. Santos</i>	213
Moisture buffering and latent heat effects in natural fibre insulation materials <i>Neal Holcroft, Andy Shea</i>	221
Potentialities of using PCM in residential buildings in Portugal <i>Olli Mustaparta, Sandra Silva, Dinis Leitão</i>	229
Home automation controller for a water-flow window <i>Luis J. Claros Marfil, J. Francisco Padial Molina, Vicente Zetola Vargas, Graciela Ovando Vacarezza, Juan Miguel Lirola Pérez, Benito Lauret Aguirregabiria</i>	237
Concept and International State of Building Commissioning Activities <i>Filipe Silva, João Pedro Couto</i>	243
Sustainable Social Housing - The User Focus <i>Jan Johansson</i>	251
Tradition in Continuity: thermal monitoring in vernacular architecture of farmsteads from northeast Portuguese region of Trás-os-Montes <i>Joana Gonçalves, Ricardo Mateus, Teresa Ferreira, Jorge Fernandes</i>	259
The contribute of using vernacular materials and techniques for sustainable building <i>Jorge Fernandes, Ricardo Mateus, Luís Bragança</i>	269
 Chapter 4: Design and Technologies for Energy Efficiency	
Urban Form and Daylighting: Examining daylighting conditions with regard to building block typologies <i>Dimitra Tsirigoti, Katerina Tsikaloudaki, Dimitrios Bikas</i>	279

Lighting Research & Development aligned to the demands for lower energy usage combined with better quality and a more holistic building design <i>Kevin Kelly, James Thomas Duff</i>	287
Energy and water use patterns in Portuguese secondary schools – main relationships. Seven school cases analysis. <i>Patricia Lourenço, Manuel Duarte Pinheiro, Teresa Heitor</i>	295
Parametric analysis of the energy demand in buildings with Passive House Standard <i>Meri Cvetkovska, Andrej Andreev, Strahinja Trpevski, Milos Knezevic</i>	303
Evaluating determinants of energy use in higher education buildings using artificial neural networks – an enhanced study <i>David Hawkins, Dejan Mumovic</i>	311
Energy efficiency of photovoltaic façade for different latitudes in Portugal <i>Helenice Maria Sacht, Luis Bragança, Manuela Almeida</i>	319
Bioclimatic buildings strategies for the climate of Araras city, São Paulo - Brazil <i>Juliana Nascimento, Helenice Maria Sacht, Luis Bragança</i>	327
Protocol of control for the model of building energetic efficiency in existing buildings <i>Ángel Rubio González</i>	335
Towards adaptive control systems: Bayesian models for energy efficiency <i>Roberta Ansuini, Albero Giretti, Massimo Lemma, Roberto Larghetti</i>	339
Sustainable Energy Management for Underground Stations: Potential Savings through Lighting Upgrade <i>Roberta Ansuini, Albero Giretti, Massimo Lemma</i>	347
Energy Assessment and Monitoring of Energy-Efficient House <i>Libor Šteffek, Petr Jelínek, Milan Ostrý</i>	355
 Chapter 5: Innovative Construction Systems	
ECODOR: sustainable proportion for concrete sleeper <i>Maria Teresa Barbosa, Mariana Maia, José Castañon, Zelia Ludwig</i>	365
Technical solutions and industrialised construction systems for advanced sustainable buildings <i>Eugenio Arbizzani, Paolo Civiero</i>	371
A project contribution to the development of sustainable multi-storey timber buildings <i>Catarina Silva, Jorge Branco, Paulo Lourenço</i>	379
ARGAD: High Performance Mortar <i>Maria Teresa Barbosa, White Santos</i>	387

Lightweight steel framed construction system	395
<i>Cláudio Martins, Paulo Santos, Luís Simões Da Silva</i>	
Assessment and monitoring of a student residential building using an innovative execution solution	403
<i>Pedro Andrade, Safira Monteiro, Helena Gervásio, Milan Veljkovic</i>	
Chapter 6: Building Sustainability Assessment Tools	
Space design quality and its importance to sustainable construction: the case of hospital buildings	413
<i>Maria de Fátima Castro, Ricardo Mateus, Luís Bragança</i>	
The Development of Building Materials Embodied Greenhouse gases Assessment System (SUSB-BEGAS) for Supporting the Green Building Certification System (G-SEED) in Korea	421
<i>Sungwoo Shin, Seungjun Roh, Sungho Tae</i>	
Can sustainability rating systems fairly assess construction solutions under assessment?	427
<i>Joana Andrade, Luís Bragança</i>	
Defining best practices in Sustainable Urban Regeneration projects	435
<i>Guilherme Castanheira, Luís Bragança, Ricardo Mateus</i>	
An investigation of Indicators, Metrics, and Methods Used to Measure and Quantify Green Buildings' Occupancy and Usage	443
<i>Mohamed Ouf, Mohamed Issa, Shauna Mallory-Hill</i>	
From lighthouse projects to sustainable building stock	451
<i>Christian Wetzel, Rosemarie Dressel</i>	
Modelling Moisture and Site-Related Information for Sustainable Buildings	457
<i>Christina Giarma, Dimitris Kotzinos</i>	
Comparison of two sustainable assessment tools on a passive office in Flanders	465
<i>Elke Meex, Griet Verbeeck</i>	
Spatial Quality Assessments for Building Performance Tools in Energy Renovation	473
<i>Fernanda Pacheco, Annemie Wyckmans</i>	
AQUA certification system and the design of buildings	481
<i>Maria Aparecida Hippert, Luiz Felipe Dutra Caldeira</i>	
The implicit definition of 'utility' in the sustainable building assessment methods	489
<i>Joan Puyo Collet, Albert Cuchí Burgos</i>	
A Review of Research Investigating Indoor Environmental Quality in Green Buildings	497
<i>Ahmed Radwan, Mohamed Issa, Shauna Mallory-Hill</i>	

Sustainable Construction Key Indicators <i>Catarina Araújo, Luís Bragança, Manuela Almeida</i>	505
Chapter 7: Renovation and Retrofitting	
Renovation project / sustainable rehabilitation centre headquarters district of Porto - Portugal. <i>Lurdes Duarte, Luís Narciso, Luis Calixto</i>	515
Strategies for regeneration of widespread building heritage in Italy <i>Paola Piermattei</i>	523
Environmental Impacts of Elementary School Building Renovation - Comparative Studies <i>Jiri Sedlák, Zuzana Stránská, Karel Struhala, Petr Jelínek</i>	531
Regenerative Universities? The role of Universities in Urban Regeneration Strategies <i>Duarte Marques Nunes, Ana Tomé, Manuel Duarte Pinheiro</i>	539
The integration of sustainable solutions in Portuguese old building architecture <i>Rui Oliveira, Maria Isabel Abreu, Jorge Lopes</i>	547
The Collective Self-Organized (CSO) housing approach: improving the quality of life towards nearly zero energy strategies <i>Silvia Brunoro</i>	555
Technologies, strategies and instruments for energy retrofitting of historic cities <i>Carola Clemente, Federica Cerroni, Paolo Civiero, Paola Piermattei, Mauro Corsetti, Pietro Mencagli, Leonardo Giannini</i>	565
The inhabitable greenhouse <i>Mathilde Petri, Mette Rasmussen</i>	573
Criteria for thermal rehabilitation of hotels in Gran Canaria <i>Maria Eugenia Armas Cabrera, Jaume Avellaneda Diaz-Grande</i>	581
Optimization of the sustainability during the refurbishment operation of a residential building <i>Isabel Mateus, Ricardo Mateus, Sandra Monteiro da Silva</i>	589
Thermal Rehabilitation for Higher Comfort Conditions and Energy Efficient Buildings <i>Mihai Cinca, Olga Bancea</i>	597
Energy efficient envelope for renovation of terraced housing <i>Andrea Boeri, Jacopo Gaspari, Danila Longo</i>	605

Chapter 8: Eco-Efficient Materials and Technologies

Using MCDA to Select Refurbishment Solutions to Improve Buildings IEQ <i>Sandra Silva, Manuela Almeida</i>	615
Which architecture has proven to be successfully climate responsive? Learning from traditional architecture by looking at strategies for resource efficient and climate responsive constructions <i>Sonja Schelbach, Udo Dietrich</i>	623
Research into natural bio-based insulation for mainstream construction <i>Ceri Loxton, Elie Mansour, Robert Elias</i>	631
Bioclimatic solutions existing in vernacular architecture - rehabilitation techniques <i>Débora Ferreira, Eduarda Luso, Sílvia Fernandes, Jorge Vaz, Carlos Moreno, Rafael Correia</i>	639
Overview of Technological Industrialized Solutions for Temporary Facilities in Construction Sites <i>Christine Miranda Dias, Sheyla Mara Baptista Serra</i>	647

Chapter 9: Urban Regeneration

Science of complexity for sustainable and resilient urban transformation <i>Serge Salat</i>	659
Sustainable tall building and vertical compact city <i>Sung Woo Shin</i>	677
Solar urban planning to the EU 20-20-20 targets <i>Miguel Amado, Pedro Rodrigues, Francesca Poggi, João Freitas</i>	697
Power of a Million Small <i>Pedro Faria</i>	709
Urban Regeneration. Developing strong sustainable urban design perspectives <i>Duarte Marques Nunes, Ana Tomé, Manuel Duarte Pinheiro</i>	719
Nearly zero energy applied to urban zones – Main Challenges and Perspectives <i>Giorgio Borlin, Manuel Duarte Pinheiro, Maria Beatriz Marques Condessa</i>	727
ICT supporting energy efficiency improvements in urban and rural neighbourhoods <i>Mari Sepponen, Martine Tommis</i>	735
Monitoring and Evaluation of urban regeneration processes. The case of Cova da Moura. <i>Ana Valente</i>	743
How to address sustainability at the city level <i>José Amarílio Barbosa, Luís Bragança, Ricardo Mateus</i>	751

Chapter 10: Design for Life Cycle and Reuse

Building connections and Material recovery: from deductive to inductive approach <i>Claudia Escaleira, Rogério Amoêda, Paulo Cruz</i>	763
Against Over-materialization. Architecture of Negatonnes <i>Leszek Świątek</i>	771
Opportunities and obstacles of implementing transformable architecture <i>Mieke Vandenbroucke, Wim Debacker, Niels De Temmerman, Anne Paduart</i>	775
Multiple design approaches to transformable building: construction typologies <i>Waldo Galle, Niels De Temmerman</i>	783
Condition monitoring and durability assessment of straw bale construction <i>Andrew Thomson, Pete Walker</i>	791
Innovative Sustainable Architecture: constructive processes and materials <i>Mariana Pinto, Pedro Henriques</i>	799

Chapter 11: LCA of sustainable materials and technologies

Carbon footprint impact of balcony glazing in Nordic climate <i>Kimmo Hilliaho, Jukka Lahdensivu</i>	809
Assessment of carbon footprint of laminated veneer lumber elements in a six story housing – comparison to a steel and concrete solution <i>Lars Gunnar F. Tellnes, Torhildur Fjola Kristjansdottir, Magnus Kron, Sigurd Eide</i>	817
Designing Model House Based on the Cradle-To-Cradle Methodology <i>Inês Ramalhete, Miguel Amado</i>	825
LCA “from cradle-to-cradle” of energy-related building assemblies: Promoting eco-efficient materials <i>José Dinis Silvestre, Jorge de Brito, Manuel Duarte Pinheiro</i>	837
Reducing fossil based energy consumption and CO2 emissions in the construction sector <i>Pedro Henriques, Álvaro Pereira</i>	847
Life Cycle Assessment of an ETICS system composed of a natural insulation material: a case study of a system using an insulation cork board (ICB) <i>Marta Matos, Liliana Soares, Luis Silva, Pedro Sequeira, Joaquim Carvalho</i>	855

Chapter 12: Thematic Session - Smart Regions: which strategies?

Energy Performance Certificate: A valuable tools for buiding-to.grid interaction? <i>Marta Oliveira Panão, Hélder Gonçalves</i>	865
Smart battery management systems: towards an efficient integration of Electrical Energy Storage Systems in Smart Regions <i>António Gano, Hugo Silva, João Correia, Maria Martins</i>	871
The NetZEBs in the near Future. Overview of definitions and guidelines towardsexisting plans for increasing nZEBs <i>Laura Aelenei, Hélder Gonçalves, Daniel Aelenei</i>	879
Nudging Residential Consumers to Save and/or Defer Energy Consumption <i>Lucy Ting, Hélder Leite, Luís Barreira</i>	887
Enabling Self-Healing Strategies in a Smart Grid Context <i>Hélder Leite, Luís Moreira, Nuno Silva</i>	893
Value materials and energy flow to toward energy independence: agro-forest and urban biorefineries <i>João Nunes</i>	897
