 Springer

Springer Series in Geomechanics and Geoengineering

Series Editor

Wei Wu, Universität für Bodenkultur, Vienna, Austria

Geomechanics deals with the application of the principle of mechanics to geomaterials including experimental, analytical and numerical investigations into the mechanical, physical, hydraulic and thermal properties of geomaterials as multiphase media. Geoengineering covers a wide range of engineering disciplines related to geomaterials from traditional to emerging areas.

The objective of the book series is to publish monographs, handbooks, workshop proceedings and textbooks. The book series is intended to cover both the state-of-the-art and the recent developments in geomechanics and geoengineering. Besides researchers, the series provides valuable references for engineering practitioners and graduate students.

Preface

The 3rd International Conference on Information Technology in Geo-Engineering (3rd ICITG) is organized in the framework of the activities of the Joint Technical Committee 2 (JTC2) on Representation of Geo-Engineering Data of the Federation of International Geo-Engineering Societies (FedIGS), by the Portuguese Geotechnical Society (SPG) and the University of Minho (UM). FedIGS is an umbrella organization linking the main international professional societies in the field of “Geo-Engineering”: the International Society for Soil Mechanics and Geotechnical Engineering (ISSMGE), the International Society for Rock Mechanics and Rock Engineering (ISRM), the International Association for Engineering Geology and the Environment (IAEG) and the International Geosynthetics Society (IGS). The conference is also supported by the Transportation Research Board (TRB) and the Deep Foundations Institute (DFI).

This 3rd conference, held in the city of Guimarães, a UNESCO World Heritage Site, in Portugal, from 29 September to 2 October 2019, followed the successful conferences of this series held in Shanghai in 2010 (ICITG2010) and in Durham in 2014 (ICITG2014).

The 3rd ICITG aims to address the most updated developments in information communication and technologies in Geo-Engineering. It covers the application to laboratory and field tests, as well as the monitoring and survey of geo-structures. It embraces also intelligent geo-materials, intelligent construction and all the aspects related to design, construction and maintenance of geo-structures.

The response to the call of abstracts for the 3rd ICITG was overwhelming. A total of 167 abstracts was accepted, from around 500 authors from 40 countries around the world. After a very rigorous review process of the full papers, 77 articles from 28 countries and regions were accepted for publication in these proceedings, with a total of 919 pages. The proceedings also include three Keynote Lectures written by internationally renowned experts. The articles were categorized into chapters as follow:

1. Use of information and communications technologies (ICT)
2. Big data and databases
3. Data mining and data science
4. Imaging technologies
5. Building information modelling (BIM) applied to geo-structures
6. Artificial intelligence
7. Smart geo-materials and intelligent construction
8. Sensors and monitoring
9. Asset management
10. Case studies in design, constructions and maintenance

The Editors hope that you find the contents of these proceedings useful in your academic and research work, as well as in professional practice, and that they help drive the geo-engineering community into the digital age we are living in.

Organization

António Gomes Correia University of Minho, ISISE, Portugal

Organizing Committee

António Gomes Correia	University of Minho, ISISE, Portugal
Joaquim Tinoco	University of Minho, ISISE, Portugal
Paulo Cortez	University of Minho, ALGORITMI, Portugal
Luís Lamas	Laboratório Nacional de Engenharia Civil (LNEC), Portugal

SPG—National Advisory Committee

Manuel Matos Fernandes	President
Alexandre Pinto	Vice-President
Ana Vieira	Secretary General
Hélder Chaminé	Deputy Secretary
António Cristóvão	Treasurer
António Gomes Correia	Chair of Conference Organizing Committee
José Luís Machado do Vale	President of Portuguese Chapter of IGS
Isabel Fernandes	Faculty of Science, ULisboa, Portugal

National Technical Committee

Ionut Dragos Moldovan	IST, ULisboa, Portugal
Manuel Parente	INESCTEC, Portugal
Alexandre Pinto	Vice-President of SPG
Ana Vieira	Secretary General of SPG

International Advisory Committee

Xia-Ting Feng	President of FedIGS
Jean-Louis Briaud	Immediate Past President of FedIGS
Charles Ng	President of ISSMGE
Roger Frank	Immediate Past President of ISSMGE
Eda Freitas de Quadros	President of ISRM
Scott Burns	President of IAEG
Chungsik Yoo	President of IGS
Russell Jones	Immediate Past President of IGS
Fumio Tatsuoka	Past President of IGS
Hehua Zhu	President of JTC2
David Toll	Immediate Past President of JTC2
Gyan N Pande	President of the International Centre for Computational Engineering (IC2E)
Allen Cadden	Past President of Geo-Institute, ASCE
Zhongqiang Liu	Chair TC309
Erol Tutumluer	Chair TC202

International Scientific Committee

Members of JCT2	FedIGS
Anna Maria Ferrero	(JTC2, FedIGS), University of Turin, Italy
Fang Liu	(JTC2, FedIGS), Tongji University, China
Ian Brown	(JTC2, FedIGS), Ian R Brown Associates Ltd., New Zealand
Martin Grenon	(JTC2, FedIGS), Université Laval, Canada
Anand J. Puppala	The University of Texas at Arlington, USA
George K. Chang	The Transtec Group, USA
Marcos Arroyo	UPC, Spain
Mike Winter	Winter Associates Limited, UK
Soheil Nazarian	The University of Texas at El Paso, USA

Reviewers

Ana Vieira	Laboratório Nacional de Engenharia Civil, Portugal
Anna Maria Ferrero	University of Turin, Italy
António Gomes Correia	University of Minho, ISISE, Portugal
David Toll	Durham University, UK
Dragos Ionut Moldovan	Universidade de Lisboa, Portugal
Fang Liu	Tongji University, China
Fumio Tatsuoka	Tokyo University of Science, Japan
George Chang	Transtec Group, USA

Isabel Fernandes	Faculty of Sciences of University of Lisbon, Portugal
Joaquim Tinoco	University of Minho, ISISE, Portugal
Junxing Zheng	Iowa State University, USA
Luís Lamas	Laboratório Nacional de Engenharia Civil, Portugal
Luis Sousa	Tongji University, China
Maria Ferentinou	University of Johannesburg, South Africa
Marte Gutierrez	Colorado School of Mines, USA
Mike Winter	Winter Associates Limited, UK
Pauli Kolisoja	Tampere University of Technology, Finland
Paulo Cortez	University of Minho, ALGORITMI, Portugal
Pijush Samui	NIT Patna, India
Sara Rios	University of Porto, FEUP, Portugal
Soheil Nazarian	UTEP, USA
Varun Dutt	Indian Institute of Technology Mandi, India

Contents

Keynotes Lectures

A Holistic Approach for Visualization of Transportation Infrastructure Assets Using UAV-CRP Technology	3
Anand J. Puppala and Surya Sarat Chandra Congress	
Learning from Field Measurements Through Heuristic Back Analysis	18
Marte Gutierrez	
Application of Artificial Intelligence in Geo-Engineering	30
Pijush Samui	
Use of Information and Communications Technologies (ICT)	
A Bayesian Network for Both Land Subsidence Risk and Soil Contamination Risk Evaluation in Large-Scale Reclaimed Lands of Shanghai, China	47
Jianxiu Wang, Linbo Wu, Tianliang Yang, Tao Cui, Zhe Wang, Weiqiang Lin, Lijie Jin, and Tianrong Huang	
A Fast Metro Tunnel Profile Measuring Method Based on Close-Range Photogrammetry	57
Ya-dong Xue and Sen Zhang	
Automatic Interpretation of Small Strain Shear Modulus Measurement Using Bender Elements	70
Ionut Dragos Moldovan and António Gomes Correia	
Cesium Based Lightweight WebBIM Technology for Smart City Visualization Management	84
Fan Liu, Huijuan Zhang, Yonghao Hu, Xinqi Guo, Zuoteng Zhu, Jinyuan Jia, and Hehua Zhu	

Failure Forecast Warning Research and In-Situ Online Monitoring of Tailings Dam Engineering	96
Guangming Yu, Daning Wang, Xiankun Zeng, Mikhail D. Kovalenko, Irina V. Menshova, Alexander P. Kerzhaev, Chunguang Wang, Yuezeng Yang, and Chunsheng Wang	
Geostatistical Analysis of Settlements Induced by Liquefaction – Case Study River Lis Alluviums, Portugal	106
Anabela Veiga, Sandra Mourato, and Hugo Rodrigues	
Geochemical Characterization of Carbonate Rocks of the Uíge’s Municipality (Angola), for Cement Industry	114
Carla Marina Nicolau Tunguno, Gomes Guenge Mucanza, and Pedro Claude Nsungani	
Information Technology and a New Theory for the Verification of the Location of the Ancient City of Helike in Achaia, Greece	122
Prodromos Psarropoulos and Alexandra Gkantona	
Infrastructure Smart Service System Based on Microservice Architecture	131
Xiaojun Li, Yue Xi, Hehua Zhu, Jiaxin Ling, and Qi Zhang	
Reducing Power Consumption of Weather Stations for Landslide Monitoring	144
Ankush Pathania, Praveen Kumar, Jyoti Kesri, Priyanka, Shubham Agarwal, Naresh Mali, Ravinder Singh, Pratik Chaturvedi, K. V. Uday, and Varun Dutt	
Big Data and Databases	
3D Geological Modelling: A Case Study for Singapore	161
Xiaohua Pan, Jian Chu, Zarli Aung, Kiefer Chiam, and Defu Wu	
A Data-Driven Approach for Direct Assessment and Analysis of Traffic Tunnel Resilience	168
Sandeep Khetwal, Shiling Pei, and Marte Gutierrez	
Artificial Neural Network Based Online Rockmass Behavior Classification of TBM Data	178
Georg H. Erharder, Thomas Marcher, and Chris Reinhold	
Big Data Analysis of Structural Defects and Traffic Accidents in Existing Highway Tunnels	189
Hao Ding, Shuai Liu, Shuang Cai, and Yangyuyu Xia	
Combining Artificial Neural Networks and Genetic Algorithms for Rock Cuttings Slopes Stability Condition Identification	196
Joaquim Tinoco, António Gomes Correia, Paulo Cortez, and David Toll	

Data Standardization of Geological Information for Rock Tunnel Engineering 210
 Qi Zhang, Zhongjun Ma, Xiaojun Li, Xiao Wang, and Lei He

Extension of the AGS Format to Incorporate Ground Model and Interpreted Data 227
 Neil Chadwick, David Farmer, Jérôme Chamfray, and Simon Miles

Machine Learning Predictive Models for Pile Drivability: An Evaluation of Random Forest Regression and Multivariate Adaptive Regression Splines 243
 Wengang Zhang and Chongzhi Wu

Physically-Based Object-Oriented Databases for Geotechnical Engineering 256
 Sara Rios, Maxim Millen, Julieth Quintero, and António Viana da Fonseca

Prediction of Forward Tunnel Face Score of Rock Mass Classification for Stability by Applying Machine Learning to Drilling Data 268
 Hisashi Hayashi, Miku Miyanaka, Haruka Gomi, Junichi Tatsumi, Nobuyuki Kawabe, and Masato Shinji

Quantitative Analysis of Seasonal Uncertainty of Metro Tunnel’s Long-Term Longitudinal Settlement via Hierarchy Bayesian Network 279
 Mengqi Zhu, Hehua Zhu, Xin Wang, J. Woody Ju, and Wei Wu

Rockburst Prediction Based on Particle Swarm Optimization and Machine Learning Algorithm 292
 Yaoru Liu and Shaokang Hou

Smart Barrier Box for Monitoring and State Conditions Evaluation of Rockfall Barrier Systems 304
 Corinna Wendeler, Suzana Svetličič, Aron Vogel, and Matthias Sorg

Use of Multivariate Adaptive Regression Splines (MARS) in the Performance Prediction of Anti-floating Anchors 315
 Hao Shen, Jinhui Li, Pengxi Li, and Sixin Wang

Data Mining and Data Science

Using Hierarchical Temporal Memory to Detect City Infrastructure Anomalies 329
 Eric Liu, Jianfeng Liu, and Yiming Zhang

Automatic Monitoring System of Blasting Vibration and Its Application Based on TC6850 336
 Ming Zhu, Peiguang Wei, Jianguo Zhang, and Xiaodong Si

Comparison of Data-Driven Methods for Evaluating Earthquake-Induced Liquefaction Potential	353
Jilei Hu and Huabei Liu	
Data-Fusion in Geotechnical Applications	365
Aron Noordam, Bruno Zuada Coelho, Ana Teixeira, and Arjan Venmans	
Design for Support Patterns of NATM Tunnel Using Machine Learning	376
Yeboon Yun, Genki Kaneko, Harushige Kusumi, Akinobu Nishio, and Tsutomu Kurotani	
Prediction of the Soil Water Retention Curve from Basic Geotechnical Parameters by Machine Learning Techniques	383
Adel Abdallah	
Predictions of Weekly Soil Movements Using Moving-Average and Support-Vector Methods: A Case-Study in Chamoli, India	393
Praveen Kumar, Priyanka Sihag, Ankush Pathania, Shubham Agarwal, Naresh Mali, Ravinder Singh, Pratik Chaturvedi, K. V. Uday, and Varun Dutt	
Spatial Sustainability Assessment Framework for Civil Infrastructure Condition	406
Mengmeng Liu, J. David Frost, and Qingsong Liu	
Stress-Strain Modelling of Soils in Drained and Undrained Conditions Using a Multi-model Intelligent Approach	419
Mohammad Rezanian and Guotao Ma	
Imaging Technologies	
Identification of Contacts in Volumetric Images of Granular Soils	431
Quan Sun and Junxing Zheng	
Joint Field Data Collection Simplified by the Use of Photogrammetry	441
Luís Ribeirinho, Isabel Lopes, and Carlos Baião	
Multisensory System Research for Large Area Deformation Based on Optical Measuring with UAV and Ground Visual Assists	450
Shaodan Zhi, Yongbin Wei, Bangan Liu, and Wei Zhao	
Reducing Fracturing Pressure by Using Novel Stimulating Technique for Ultra-tight Rock	460
Zhanwei Yang, Yun Xu, Bo Cai, Liwei Wang, and Liao Wang	

Building Information Modeling (BIM) Applied to Geo-Structures

BIM in Geotechnics - Application to Road and Railway Construction . . . 471
 Franz Tschuchnigg and Christian Lederhilger

Case Study on the BIM-Based Design of a Complicated Underground Road Hub Above Crisscross Metro-Lines by a Combined Numerical Method 483
 Yi Shen, Wei Sun, and Sheng Wang

Design and Application of Automatic Monitoring and BIM Technology to the Construction of Shield-Bored Underneath Building 493
 Wei Zhao, Yongbin Wei, Bangan Liu, Shi Liu, and Longge Xiao

Proposition of Sustainable and Long-Term Geotechnical Data Management to Support Building Information Modeling 502
 Mickaël Beaufils, Bastien Le Hello, Julien Lorentz, Juan Castro-Moreno, Maxime Beaudouin, and Sylvain Grellet

Artificial Intelligence

Prediction of Rate of Penetration Based on Random Forest in Deep Well 517
 Shouding Li, Jialiang Zhang, Siyuan Wu, Weichang Chen, Dong Chen, Xiao Li, and Han Wang

Territory-Wide Identification of Geological Features on Aerial Photographs Using Machine Learning for Slope Safety Management . . . 527
 J. S. H. Kwan, W. K. Leung, F. L. C. Lo, S. Millis, J. W. Z. Shi, M. S. Wong, and C. Y. T. Kwok

Towards a Pile Quality Prediction for Screw Displacement Piles Using Bayesian Networks 540
 Ana Teixeira, Aron Noordam, and Dirk de Lange

Smart Geomaterial and Intelligent Construction

Automated Production Control System of Embankment Materials at Rock-Fill Dam 553
 Yoshikatsu Yonemaru, Katsutoshi Fijisaki, Teru Yoshida, Hiroaki Kobayashi, and Hiroki Sakamoto

Continuous Compaction Control – Mathematical Models and Parameter Identification 563
 Guanghui Xu and George K. Chang

Correlating Continuous Compaction Control Measurements to In Situ Modulus-Based Testing for Quality Assessment of Compacted Geomaterials	585
Aria Fathi, Cesar Tirado, Mehran Mazari, Sergio Rocha, and Soheil Nazarian	
On Frequent Evaluation of Compacted States and Soil Properties by Soil Stiffness Index Measurements	596
Fumio Tatsuoka and António Gomes Correia	
Research on Intelligent Control and Evaluation Technology for Soil-Cement Mixing Pile Construction	615
Yu Wan, Zhiduo Zhu, Lei Song, Xiaoyu Xu, and Jinping Liu	
Sensors and Monitoring	
Application of a Generalised MPK Model with Data Fusion Approaches for Landslide Risk Assessment	635
Chathurika Jayasundara, Ravin N. Deo, and Jayantha Kodikara	
Estimated Monitoring Methodology for the Tailings Dam Stability	644
Alan Lolaev, Aleksan Oganessian, Emil Oganessian, and Alexander Badoev	
Experimental Characteristics of Bolt-Reinforced Slope Motion Based on MEMS Sensors	654
Wen-long Li, Yan Gao, Quan Yuan, and Zhiyi Wu	
Experimental Investigation of Reinforced Slopes' Response, to Increased Surcharge Load, with the Use of Optic Fibre Sensors	662
N. Simelane, M. Ferentinou, and M. Grobler	
Image Analysis and Structural Monitoring of Physical Geotechnical Models Subjected to Seismic Loading	674
Elena Kapogianni, Stella Tsafou, and Michael Sakellariou	
Integrated Monitoring of Seasonal Variations and Structural Responses to Enable Intelligent Asset Management of Road Infrastructures	687
Pauli Kolisoja, Altti Kurki, Antti Kalliainen, Nuutti Vuorimies, and Timo Saarenketo	
Measurement of Pile Cover Thickness Using Distributed Fibre Optic Sensors	699
Yi Rui and Qianchen Sun	

Monitoring and Regulating Tidal Influenced Groundwater Heads During Reconstruction Works of a Hydraulic Barrier Structure at the Eider Estuary in Germany 706
 Thomas Nuber, Gerd Siebenborn, and Marco Bardenhagen

Monitoring of Ground Behavior During the Excavation of an Underground Ramp 718
 Grant Hasan, Alireza Afshani, Hirokazu Akagi, and Keiichiro Endou

Optimization of Location of Robotic Total Station in 3D Deformation Monitoring of Multiple Points 730
 Bangan Liu, Yongbin Wei, Shaodan Zhi, Wei Zhao, and Jindi Lin

Research on Application of Infrastructure Smart Service System (iS3) on Prediction of Excavation in a Subway Station of Ningbo Metro 738
 Jixin Tang, Liang Li, Denghua Yu, Weijia Zhu, and Chao Chen

Securing the Future of Cultural Heritage Sites, Utilizing Smart Monitoring Technologies: From the Laboratory Applications to the Acropolis of Athens 750
 Elena Kapogianni, Prodromos Psarropoulos, and Michael Sakellariou

Smart Monitoring of Sinkhole Formation Using Optic Fibre Technology 763
 Jeandre Labuschagne, Maria Ferentinou, Michael Grobler, and S. W. Jacobsz

Asset Management

A Python-Driven Application for Evaluating Lifecycle Resilience of Water Distribution Network 777
 Xiangnan Zhou, Fang Liu, Yuanxin Ye, and Xiaoyu Yu

Estimating Tunneling-Induced Settlement of a Pipeline Buried in Heterogeneous Ground Through Stochastic FEM by Bridging Available Tools 789
 Yu Gao, Fang Liu, and Yuxuan Che

Use of Geotechnical Asset Data Within Highways England: The Journey so Far and the Future 797
 Tony Daly, Savina Carluccio, Divya Bhanderi, David Patterson, Christopher Power, and James Codd

Case Studies in Design, Constructions and Maintenance

Analytics over Multi-sensor Time Series Data – A Case-Study on Prediction of Mining Hazards 815
