OPINIONS AND INFORMATIONS

The International pavement engineering community is invited to Québec City in August 2006, for the 10th annual International Conference on Asphalt Pavements. The local organizing committee has assembled the necessary resources and expertise to ensure that the conference, held for the first time in Canada, is a rich scientific, social and cultural experience for all delegates in attendance.

Over the 40 years since their inception in Ann Arbor, Michigan, the international conferences on asphalt pavements have proved to be the focal point for the presentation of new ideas and technologies aimed at improving the design and maintenance of asphalt pavements.

In the tradition of preceding conferences, Université Laval and the ministère des Transports du Québec will join with the International Society for Asphalt Pavements to share their unique experience and provide a new opportunity to discuss the latest developments in asphalt pavement technology at the 10th annual International Conference on Asphalt Pavements, August 12 to 17, 2006, in beautiful Québec City.
